

Madrid Market Brief

July 2026

Market Regime

Hot but decelerating

Housing costs and competition are well above this city's own record, but have been easing for two periods. Levels stay high long after momentum turns, and this is where that gap opens.

Indices

in standard deviations from this city's normal

Demand momentum **+0.04** about normal

Is underlying demand strengthening?

Housing pressure **+1.18** above normal

Is demand outrunning the housing available?

Supply response **-0.94** below normal

Is supply catching up?

Distress **+0.13** about normal

Is an orderly slowdown turning into financial stress?

Forecast Summary

Quantile intervals (p10 / p50 / p90) for the next issued targets. Where noted, the selected model does not beat its baseline.

Target	Question	p 10	p 50	p 90	Model	Status
transfers_3m	How many homes will change hands in Madrid province three months from now?	8649	10576	12903	random walk	Baseline
transfers_6m	How many homes will change hands in Madrid province six months from now?	8152	10582	13104	random walk	Baseline
appraised_2q	What will a square metre of Madrid-province housing be appraised at two quarters from now?	4234	4307	4374	drift	Baseline
appraised_4q	And a year out?	4365	4530	4714	drift	Baseline
unemployment_3m	How many people will be signed on as unemployed in Madrid city three months from now?	117270	128251	134770	random walk	Baseline
unemployment_6m	And six months out?	107605	127022	137201	random walk	Baseline

“Baseline” indicates the model does not outperform a naive alternative.

Track Record

No forecasts have yet matured. 6 forecasts are pending scoring.

Districts Ranked

Ranked by current rental price per square metre.

Rank	District	€/m ²	Population	Vacancy %	Licensed Lets
1	District 07	18.55	140971	8	60
2	District 04	18.31	146462	8.3	79
3	District 01	17.7	141202	11	218
4	District 05	17.07	148426	10.7	109
5	District 06	16.08	168966	23.7	177
6	District 03	16.04	118987	10.4	40
7	District 02	15.97	159649	15.7	121
8	District 09	15.5	126955	13.6	24
9	District 08	13.77	257272	25.3	52
10	District 16	13.66	210719	27.7	28
11	District 15	13.28	230270	30.7	133
12	District 21	13.1	51020	21.1	17
13	District 20	12.69	169635	23.3	18
14	District 18	11.87	128715	28.2	9
15	District 11	11.76	279925	32.7	85
16	District 14	11.73	94620	24	16
17	District 10	11.54	252646	33.2	68
18	District 13	11.48	259136	39.6	79
19	District 12	11.18	153887	32.1	48
20	District 19	11.01	99011	29.4	7
21	District 17	10.26	174376	36.5	17

Data Sources

Every metric carried in this report comes from an official source. Dates shown reflect the most recent observation available.

Property transfers (INE) Province-level count of registered property transfers. Leads official price statistics.

Appraised housing value (MIVAU) Quarterly valuation per square metre. The value banks lend against.

Registered unemployment (SEPE) Monthly count of people signed on at the job office in the city.

District data (Madrid City Council) Monthly population, business premises inventory, tourist dwellings licensed, and building permits.
Geographic scope: the 21 districts of Madrid city.

Search indices (Google Trends) represent attention rather than measured demand or activity. They reflect how often people are searching for topics, not how many are actually buying, renting, or relocating.

CitySignal is an open system for honest market forecasting. Every number shown here is generated from published data and is reproducible. No figures are hidden, no models are proprietary, and no track record is revised.
